RESTRICTION REQUIREMENT

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

- I. Claims 1-38,43-46, a devuce, classified in Class 257, subclass 355.
- II. Claims 39-42 drawn to a method of making a device, classified in Class 438, subclass 149.

Inventions I, and II are related as combination and subcombination. The Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations. (M.P.E.P. § 806.05(c)). In the instant case, said plurality of circuits could have been formed ahead of said switch element.

Because these inventions are distinct for the reasons given above and as shown by the above different classifications, the fields of search are not co-extensive and separate examination would be required for examination purposes and the restriction requirement as indicated is proper.
